## SCUDO - Safe and Comprehensive Urban Development and Transport Management for Disruption-Resilient Operations

Scientific Responsible Assistant Professor Konstantinos Gkiotsalitis

SCUDO's Vision is to identify and classify scenarios of disruptive changes, assess their impact on different socio-economic groups, improve the monitoring of disruptions and the quantification of uncertainties and develop methods for designing and managing transport systems based on the Safe System Approach. This will increase the resilience and safety of transport systems. Additionally, SCUDO aims to establish a Pan European Platform that integrates digital solutions and data in order to support a comprehensive evaluation of the impact of different types of disruptions to different geographical areas and user groups.
